After the Criminal Doctors.

The Kentucky State Board of Health has issued a scorching circular against physicians who perform criminal operations. The license of any physician guilty of such practice will be revoked and the offender vigorously prosecuted. The Board appeals to honesty of the medical profession in its organized capacity, and to all good citizens and officials to aid them in the enforcement of this wise and timely law.

It is also made the duty of the Board to revoke the license of any physician who becomes addicted to the liquor or drug habit to a degree which disqualifies him to practice with safety to the people. No drunkard or opium or cocaine habitue is fit to practice a vocation where health and life are constantly dependent upon acuteness of intellect or correctness of judgment. This is a mild offense compared with the cowardly murder involved in every criminal abortion, and this phase of the law will be used to secure reformation wherever this is possible.

The convict labor of the Frankfort penitentiary which has been employed by Ford-Johnson Company in the manufacture of chairs and furniture at Frankfort, has been leased to the Frankfort Shoe Company at 85 cents per day. The retiring company got the labor at 45 cents per day. The new company will use the labor in the manufacture of shoes in the prison.

Will Heather came up from Lexington Tuesday with two grips full of whiskey and sold it out to various persons in this city and made his escape back to Lexington before the officers detected what was going on. Warrants have been issued for his arrest but they are not likely to be served as the offender will likely steer clear of Clay City in the future.

The best way to head off the mail order houses is for the local merchant to advertise liberally and get the trade themselves. All of the successful mail order houses are heavy advertisers; and if they can make it pay, why not the local merchants?

Prof. F. P. Tracy closed a most successful school at Waltersville Saturday. The school maintained an average attendance of 85 during the entire session which is very flattering for a country school.

Noah Rose has accepted a position with Spears & Company, the new flour mill concern at Paris as traveling salesman. Noah is a hustler and will acquire much trade for his firm.

Dr. W. C. Martin, of Vinton, leaves this morning for Louisville where he will, with this term of school, finish up a course in medicine and be admitted to practice his new profession.

The Jamestown Exposition.

"Kentucky-Jamestown Week" is to be observed throughout the State during the six days commencing Jan. 21. Arrangements to this end have been made by the Kentucky Jamestown Exposition Commission, of which Col. J. Stoddard Johnson is president. From Jan. 21 until the opening of the Exposition only 95 days will elapse. In order to erect a State Building and make an exhibit of Kentucky's products and resources it is necessary that the required fund of \$40,000 be secured at once.

During this week an emergency campaign for funds is to be waged. The president of the Commission has named a prominent citizen in each county of the State to act as county chairman of a committee of five or more persons. Personal solicitation will be made of individuals and business enterprises in the respective counties for the purposes of securing funds. It is the hope of the Commission to obtain thousands of subscriptions and small contributions as well as large ones will be acceptable.

Meeting of A. S. of E.

The Kentucky State Union of the American Society of Equity holds its annual convention at Frankfort on January 10, 1907. This will undoubtedly be the greatest meeting in the history of the union, in view of the fact that at the recent national convention of the society it was decided to do all in its power to perfect its organization in 1907. This means the outlining of a whirlwind campaign in Kentucky to completely organize the tobacco producing counties and to promote thorough organization for all crops in all parts of the State. The meeting will be continued till the work is completed.

Much Success has already been achieved by Kentucky growers of dark tobacco in acting in accordance with the plans of the society and the recent determination with which this has inspired the burley tobacco growers, should make this meeting abundantly provocative of good results.

The Iowa experiment station has discovered that excellent sugar can be made from pumpkins and the authorities of the State Agricultural College declare that high grade sugar can be obtained more easily from pumpkins than from beets. Pumpkins have already been produced which show that the sugar contents will exceed 4 per cent. In three years it is believed this can be increased to 12 per cent., which is equal to the sugar contents of the best sugar beets.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.
